### COMPANY INTRODUCTION - OVERVIEW OF SERVICES

Wright Bros., LLC d.b.a. WB Construction respectfully submits its interest and qualifications for work to be performed under its primary NAICS code of 236220 Commercial and Institutional Building Construction.

WB Construction is a Native American-owned Small Business that specializes in all aspects of general commercial construction. WB was certified by the Small Business Administration as a Small Disadvantaged business (SDB) and HUBZone in May of 2010, and 8(a) in August of 2013.

Because of the Federal Government's demonstrated leadership in construction contracting, our company has chosen to focus most of our efforts in that arena with great success. It is our intent to submit offers for services with your agency as a prime contractor for projects issued as sole source/best value 8(a) or HUBZone Set-Aside. We utilize P6 scheduling / cost loading. We are familiar with QCS/RMS and have implemented a 3-phase quality control program for all our construction projects. Our project staff maintains appropriate CQM and OSHA cards while following the guidelines of the EM 385 manual.

Experience performing a broad range of stand-alone and IDIQ type projects has prepared WB to deliver a best value solution for all your construction needs. We hope to build on our record of successful performance by partnering with your agency on future construction projects.

Thank you for the opportunity to share this overview of our experience and capabilities. If I can answer any questions or provide other information, please do not hesitate to call on me at any time. We look forward to the opportunity to serve you.
